Education

- **Bachelor of Computer Science,** Misr International University, graduated in 2018

Skills

- Java SE(servlets, jersey, Hibernate, Jsf, Jsp, SpringBoot)
- HTML, CSS, JavaScript, jQuery, Bootstrap
- Familiar with Linux (Ubuntu)
- REST, microservices architecture, web API
- Software Engineering with UML diagrams
- Jenkins, Kubernetes, Docker, AWS
- SQL, Oracle, MySQL Databases
- Angular 11.
- Firebase (noSQL database)
- Maven, Kafka, Redis

Experience

- **Software Engineer II,** DXC technology, January 2023 (present)
  - Part of team that develop a web app for insurance companies based in UK and work with SAFE agile method.
  - Work as a backend developer using java, microservices architecture, spring boot and maven.
  - Responsible to implement features in Rest APIs, write test cases with Junit, do a code Review and make CI using Jenkins.
  - Conduct technical interviews for junior and senior level software engineers.
  - Work on features facilitate the payments and installments to the customers in our insurance system.
  - Work on feature that helps in risk analysis process.
- **Senior Java developer,** Eshtri Group, December 2021- January 2023
  - Develop an E-commerce web app.
  - Build users microservice with JWT tokens and Spring Security
  - Enhance payment plan microservice by making a scheduler that calculates all the data one time and saves it every 2 hours
  - Build microservice to manage all payment plans business in the web app.
  - Make many integrations with third parties in the app like (Zoom, Twillio, Fawry, and SAP System).
- **Java developer,** Asset Technology June 2018 - December 2021
  - Develop, make change requests, and third-line support in systems and services in telecom companies.
  - Develop high quality, high performance, and highly reliable software applications**.**
  - Creating features that work across multiple software applications, systems & portals.
  - Working as a part of a team to make an e-forms system to STC using microservices Architecture, Jenkins,Zuul, Eureka, Kafka, Spring, PostgreSQL and JPA framework.
- **Web developer, ComRec** solutions, November 2018 - June 2018
  - Make new features in the web applications using SQL, MVC, and Entity Framework and make primitive UI to these features to apply the business logic of this feature using (AngularJS).
- **Software developer (graduates program),** GIZA Systems, August 2018
  - Work on real MVC projects and CRM.
  - develop in CRM using dynamicAX and work on reports (BI).
- **Co-Teacher assistant,** MIU , Fall 2018
  - **Courses:** introduction to computer science and networks

Projects

● ***Graduation project:*** prosthetic arm software that takes the EMG signals from the hand by MYO deviceand can predict the movement of the arm and the fingers using machine learning.

● ***Tic tac toe with AI:*** implemented the game 3*3 tic tac toe game with AI impossible to win it

● ***Bounce Game in unity:*** make a ball and prevent obstacles in unity.

● ***Content management system (CMS):*** this website show articles that people publish after the article pass on many phases of revision and is approved by many roles

● ***Carpooling app:*** implemented a mobile app that makes the people connect with each other to make carpool by using GPS and firebase

● ***Task manager:*** implemented the allocation of processes and take its id and can kill it.

● **Visualization of different data structures using C++** : Included: (Binary Search Tree, Linked List, Binary Search, Queue, Stack, Morse code).

● **Cycling website :** develop a website for cycling community in egypt has many features like showing the cycling events held in egypt by location and time , write and read blogs related to cycling activities and show the cycling groups and their activities.

Extracurricular Activities

● **Team Leader,** M.A.S. (Michael Archangel Scout), 2003 - Present

- Organized camps, events and weekly meetings

● **Coordination team member,** *warsha (student activity)*

- Working as part of coordination team that coordinate of the events in the student activity.
